Housing Demand Outstripping Supply In Henan

(mn sq.m)

Source: China Statistical Yearbook, Henan Statistical Yearbook

(a) Affordability ratio = average price of a 100sqm apartment / average annual household disposal income, assuming average household size of 3. Calculations are based on 2009 data. Lower number indicates better affordability

High End-User Demand

- Upgrade and first-time purchase represents a significant portion of overall demand for CCRE's products
 - Demand primarily driven by desire to improve living conditions
 - Greater end-user demand translates into housing markets with less volatile property prices
- Local Henan residents constitute majority of CCRE's customer base
 - Limited number of purchasers from outside Henan
 - Level of demand from speculative investment remains at a low level
 - Less prone to policy changes

End-user driven market results in less exposure to cyclicity and policy changes compared to other PRC cities

Market Update & Outlook

- ▲ The overall development of the Henan property market remains predominantly an end-user driven market, therefore the impact to the Henan market by the tightening measures has been limited in the first half 2011
- ▲ Henan real estate market sales reached RMB75.4bn up 41.9%
- ▲ Henan property transaction volume reached 21.8mn sq.m. up 20%
- ▲ The transacted ASP in Henan climbed to a modest RMB3,463/sq.m. up 18.9%
- ▲ Continue urbanization creates supporting demand for housing. Henan's urbanization rate reached 39.5% vs the national average of 47.5%, with an annual urbanization growth rate of 1.8%p.a., this translates into 1-2 million consumers moving into cities each year
- ▲ We expect the Henan real estate market to continue to grow steadily
- ▲ We anticipate that the tightening measures already implemented by the state and local governments will continue or expand in the second half of 2011 and have adjusted our strategy to minimise the impact to the Group's operations
